## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-19 are allowed.

#### *Reasons for Allowance*

2. The following is an examiner's statement of reasons for allowance:

The closest prior art of record issued to Uranaka fails to teach or suggest a communication system and its corresponding method for the transfer of an in-progress telephone call from a wireless device, such as a cellular telephone, directly to a wired device, or desktop telephone via a short-range wireless communication link as cited in claims 1, 8, 14-15 and 18-19 for a wireless device and a wired device capable of performing the in-progress call transfer. It seems that Uranaka teaches the same concept as the present invention (as in Fig. 25), but it is not. The examiner agrees with the applicants, as in Figure 28, the cellular telephone eventually does receive a call reception notice at step 2801, and the user gives an off-hook manipulation at step 2802 for the fixed phone to receive the call at last step 2805. Through this process, the cellular phone of Uranaka does not make a call connection (call established) on the cellular phone and then transferring an in-progress call (during or while talking on the call) to the desktop or fixed phone as required by the present invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Zicker et al (PTO 892 attached) disclose systems related to wireless and wired phones interactions and call routing.
